

Liquid Crystal MAGNA

AT A GLANCE

Photocentric

AVAILABLE ON
THIS PRODUCT
EXTENDED
WARRANTY

Overview

Whether it's small batch, on-demand or full production, the brand-new Photocentric LC Magna II is your perfect production partner to consistently deliver accurate end-use parts at scale.

Product Highlights

13.3mm per hour
enabling large volumes
of parts to be printed
quickly, accurately and
consistently.

With a large platform
and build volume of
510 x 280 x 350mm a wide
variety of parts can be easily
produced.

Incredibly fast cure
speed of 2-8 seconds
per layer at 100µm layer
thickness

What Our Customers Say

"We simply had to have a look because the numbers almost seemed too good to be true. We're running at 100%. That's a massive jump from where we were with other machines."

Matt Everatt

Technical Director, Smilelign & S4S

"Having an LC Magna 3D printer in-house that can deliver fast results has been fundamental to our efforts – it wouldn't be possible without this responsive technology."

Matt Mendez

Owner, LI Racing

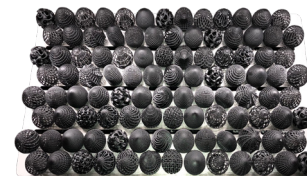

"By working together with Photocentric and their LC Magna 3D printer we want to continue to push the boundaries in investment casting to make the impossible, possible for our customers, and their customers."

Lennart Van den Doel

Managing Director, 3D Next Level

Dental parts printed with LC Magna

Luxury caps printed with LC Magna

Large parts printed with LC Magna
