

A1 Antifoam

SPECS

FEATURES

Photocentric A1 Antifoam is an effective anti foam suppressing the build up of bubbles in flexographic spray wash systems. It is silicone based for maximum and long-lasting effectiveness. Change when water becomes solid white.

PRODUCT SPECIFICATIONS

Contains silicone.

HEALTH AND SAFETY

E1 is not harmful but the operator should adopt normal industrial practices with respect to personal protection.

PROCESSING INSTRUCTIONS

Add to the clean water bath. The addition concentration depends upon the hardness of the water and foam creation of surfactant. It is better to add the minimum amount needed to suppress the bubbles and then top it up if the bubbles reappear. Addition volume is typically less than 1%.

PACKING SPECIFICATIONS

1KG AND 18KG

STORAGE CONDITIONS

Store above freezing.
