

Granted Patents

GB 2372575	Method for forming a sachet
GB 2422678	Method of making a photopolymer plate
US 8,114,569	Maskless photopolymer exposure process and apparatus
EP 3295246	Method for making an object

Published Patent Applications

US 2018/0141268	Method for making an object
US 2018/0299779	Method for making a lithographic printing plate
EP 3353604	Methods for making an object and formulations for use in said methods
US 2018/0282544	Methods for making an object and formulations for use in said methods
EP 354185	Methods for making a metal, sand or ceramic object by additive manufacture and formulations for use in said methods
EP 3572874	Methods for making a metal, sand or ceramic object by additive manufacture and formulations for use in said methods
EP 3572210	Stereolithographic 3D printer
EP 3575062	Stereolithographic 3D printer
US 2019/0366635	Stereolithographic 3D printer
US 2020/0047407	Method for improving resolution in LCD screen based 3D printers
US 2020/0079966	Methods for making a metal, sand or ceramic object by additive manufacture and formulations of use in said methods
US 2020/0094469	Automation of 3D printing process using LCD screens
GB 2578188	The separate control of sub pixels in LCD 3D Printing
GB 2578961	Automation of 3D printing process using LCD screens
US-2021-0122104	Enclosed chamber printing
