

# Ultracur3D® Daylight Resins - Test Results

## Chemical Resistance of Ultracur3D® Daylight Line\*

Specific chemical tests were performed on the Ultracur3D® Daylight Line materials and indications on changes of the mechanical properties like elastic modulus, tensile strength and elongation at break of the materials were studied. The overviews below show the worst of three:

\* It remains the responsibility of the device manufacturers and/or end-users to determine the suitability of all printed parts for their respective application.

# Ultracur3D® Daylight Resins - Test Results

## UV Stability of Ultracur3D® Daylight Line\*

Specific ageing tests were performed on the Ultracur3D® Daylight Line materials and indications on changes of the mechanical properties like elastic modulus, tensile strength and elongation at break of the materials were studied.

\* It remains the responsibility of the device manufacturers and/or end-users to determine the suitability of all printed parts for their respective application.
